Yasushi Kojima
Global Quality Officer
Fujitsu
www.fujitsu.com

1979 Master degree of mechanical design

1979 Joined Fujitsu Transmission Group – I have physical design experience and especially, thermal and system control study. I designed marine transmission undersea unit and outside cabinet transmission system for NTT in Japan domestic and for BOC in US.

1999 – 2005 Assignee at Fujitsu Network Communications, Richardson, TX – I first led Network servicing to make an outside cabinet system in FNC and next led component quality and selection

2005 – Returned to Fujitsu – I joined GR-78 revision WG with FNC and discuss the physical area. I am supporting Fujii san who is Japan Hub chairman, and on how QuEST Forum and TL 9000 can be expanded in Japan.
