

UT Dallas Team Member

Adam Blake Younger – Software Systems Specialist

Blake Younger joined The University of Texas at Dallas in July 2009 as the Network and Systems Administrator to provide IT technical assistance, support, and advice to the QuEST Forum staff and to UTD's Cyber Security and Emergency Preparedness Institute (CSEPI).

As the CSEPI's Network and Systems Administrator, Blake is primarily responsible for the local area networks (LAN) and internet/intranet systems of the QuEST Forum and CSEPI. This includes installation, upgrades and maintenance of network equipment such as terminals, firewalls, switches, routers, workstations, and servers as well as routine backups of these servers for disaster recovery purposes. Blake also provides end-user support for the QuEST Forum and CSEPI staff.

Prior to his current assignment, Blake worked as a Network Administrator and Help Desk Supervisor for an executive level staffing agency where he provided support for 225+ end users in 4 locations. Blake has also worked at Texas Instruments where he was a Process Engineer.
